Cooking Oil Filter Machines

PURAOIL 250

We have combined technology and innovation to develop the PuraOil 250 oil and fat filtration system to cut costs and produce the best food quality. The new .25 HP motor provides added power and even better filtration and oil cleansing.

PuraFilters machines:

- Dramatically improve food quality**
- Provide the best filtration system**
- Prolong the life of the oil and fat by up to 80%**
- Cut oil and fat costs by up to 40%**
- Filter from cooking temperatures - no delays**
- Provide easier and safer oil handling**
- Reduce the time needed for fryer cleaning**
- Have rugged construction with safety in mind**
- Two year manufacturers warranty**

Essential equipment for all catering involving deep frying

PURAFILTERS

Improve your profit with the **PURAOIL 250**

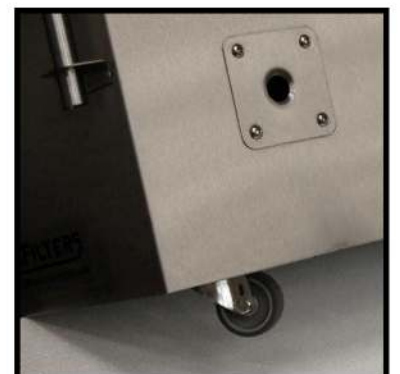

PuraOil 250 is designed for use by caterers on a daily basis to maintain the highest standards of quality and presentation in food produced using deep oil frying. Food appearance and taste are both significantly improved by daily filtration using the PuraFilters system. The PuraOil 250 is the ideal machine for removing suspended food particles from oil and fat used in fish and chip shops, all fast food outlets, restaurants, hotels, pubs, factory canteens, school kitchens, food processing plants, hospital and other institutional kitchens and Ministry of Defence catering establishments.

PURAOIL 250 system features
